Website Choice

Organisation Description:

I have decided to develop a website for my own organization, Fuse Techni NPC. It is a technology-based non-governmental organization (NGO).

First, we have to understand what a technology-based NGO is. It is a non-profit organization that uses technology to deliver its vision and mission efficiently. It alters traditional methods to make a faster, easier and efficient work environment.

Fuse Techni NPC is a technology-based NGO that is originally based and founded in South Africa KwaZulu Natal, Durban. It focuses on bridging the gap between South African citizens and technology. Its purpose is to help these citizens build up their skills in the new technologically advanced world. It does this by providing digital skills training as it focuses more on the youth of South Africa that is live in disadvantaged communities. It provides them with digital skills that will benefit them in the workforce.

They could grow and expand nationally, even internationally with a new and new improved website. It will help them market their work and allow for international partnership, thus creating job opportunities for South Africans abroad.

Fuse Techni NPC is currently lacking a proper marketing platform as well as funding and recognition.

Reasons for Choosing the Organisation:

I chose this organization because it bridges the existing gap between South African youth living in disadvantaged communities. It is one of the missing links in South Africa's economic industry. By exposing it globally, it will boost economic growth by hindering the unemployment rate, especially amongst the youth.

Website Goals and Objectives

Aim of the Website:

The aim is to help the technologically disadvantaged and unemployed youth in underprivileged communities. Using the website, they can reach out to Fuse Techni NPC enquire and apply with all the required documentation. From there, supplementary steps will be taken. This website will help Fuse Techni NPC expand, make it user-friendly, efficient, reliable and easier to function. It will assist the NGO with marketing and hopefully attract potential investors. Furthermore, it will help them with their marketing, funding and recognition challenges.

How Will the Website Benefit the Organisation?

This website will not only benefit Fuse Techni locally or regionally but also internationally. It will help market their work as they continue to produce digitally skilled young adults. It will also assist them with their operations and functionality. This will promote and advance their connections leading to stimulated success of the organization.

The website will be easy to operate for users and provide enough information about the organization. From its operations, vision and mission to recruitments and benefits from being with Fuse Techni NPC.

Website Goals:

1. Increase Recognition

- Gain 25% visits within two weeks after launching
- Monitor weekly visits
- Operate the website 24/7

2. Easy User Experience

- User-friendly website
- Fast and effective
- Clear message on the products and services Fuse Techni NPC has to offer

3. Increase Subscriptions

- Gain 30% subscriptions within three weeks
- Reasonable benefits for subscribers
- Form and earn trust with the users

4. Attract Potential Investors and Partnerships

- Fuse Techni must have a clear Vision and Mission
- Transparency through the website

Mission:

Our mission is to empower our youth living in disadvantaged communities through digital skills training and employment opportunities.

Vision:

To build a future where every individual has the technical agency and advantage to thrive in the digital economy.

Website Objectives:

1. Keeps communication between the user and the organisation simple and beneficial.
2. Easy navigation throughout the website.
3. Includes client credibility and partnerships with other clients.
4. Shows the purpose of the organisation through the website.

Target Audience:

The primary target audience for Fuse Techni NPC includes:

- Unemployed youth living in disadvantaged communities who require digital skills training and career development opportunities.
- High school learners interested in technology, programming, web development, and cybersecurity.
- University and college students seeking practical digital skills and work-readiness training.
- Potential sponsors, investors, and donors interested in supporting youth development initiatives.

- Community organisations, schools, and government departments looking to partner with technology-focused educational programmes.
- Volunteers and mentors willing to contribute their expertise and support the organisation's mission.

Key Performance Indicators:

Key Performance Indicators	Target	Measurement Tool
Number of visitors on the website	600 and more after launching in Week 5	Google Search Console.
The pages must load faster	Less than 4 seconds	Google PageSpeed Insights.
Number of visitors who sign-up and submit forms	15 per week	Analysing and totalling the forms.
How many donations are received?	25% who visit and engage on the website	Payment platforms and stats on the donations page.

Current Website Analysis

Current Website Analysis

The current Fuse Techni NPC website is a newly developed website intended to provide information about the organisation, its services, and opportunities available to youth. The website was analysed to identify strengths and areas for future improvement.

Strengths of the Current Website

- Provides clear information about the organisation's mission and vision.

- Includes dedicated pages for Home, About, Services, Support, Contact, and Donations.
- Easy navigation structure connecting all pages.
- Responsive design that supports mobile and desktop devices.
- Interactive elements such as service cards and FAQ sections.
- Contact forms allow users to communicate directly with the organisation.

Weaknesses and Areas for Improvement

- Limited online application functionality for programme enrolment.
- No user account or member login system.
- Limited multimedia content such as videos and success stories.
- Search Engine Optimisation can be improved further.
- Additional accessibility features can be implemented.
- Future integration of online learning resources and student progress tracking.

Design and User Experience

Design Aesthetic and Branding

The Fuse Techni website follows a modern technology-inspired design that reflects innovation, digital transformation, and youth empowerment. The design focuses on professionalism while remaining approachable and engaging.

Colour Scheme

Primary Colour: Deep Blue (#0A3D62)

Secondary Colour: Purple (#6C5CE7)

Accent Colour: Cyan (#00CEC9)

Background Colour: White (#FFFFFF)

Typography

- Heading Font: Poppins Bold
- Subheading Font: Poppins Semi-Bold
- Body Text Font: Arial or Sans-Serif
- Consistent font sizing for readability across all pages.

User Experience Considerations

- Easy-to-use navigation menu.
- Responsive layout for mobile phones, tablets, and desktops.
- Clear call-to-action buttons.
- Fast-loading pages through optimised images.
- Consistent design across all pages.
- Interactive elements such as service cards, FAQ sections, and team member profiles.
- Accessible content with readable font sizes and image alternative text.

Figure 2: Fuse Techni NPC website design budget.

Budget Notes

- Costs are estimates and may vary depending on project requirements.

- GitHub Pages hosting reduces overall hosting costs.
- Additional costs may arise from premium domains, third-party integrations, and maintenance.
- Future upgrades may include online application systems and advanced user features.

Technical Requirements

6.1 Hosting and Domain

- **Domain Name:** www.fusetechni.co.za
- **Hosting Platform:** GitHub Pages
- **Frontend Technologies:** HTML5, CSS3, JavaScript
- **Development Environment:** Visual Studio Code
- **Version Control:** GitHub
- **Responsive Design:** Mobile-first approach
- **Browser Compatibility:** Google Chrome, Microsoft Edge, Mozilla Firefox
- **Security:** HTTPS and secure form validation
- **Performance Goal:** Page load time below 4 seconds

6.2 Technology Stack

Component	Technology Used
Frontend	HTML5
Styling	CSS3
Functionality	JavaScript
Development Environment	Visual Studio Code
Version Control	Git and GitHub
Website Hosting	GitHub Pages

Browser Testing	Google Chrome, Microsoft Edge, Mozilla Firefox
Image Design Tools	Canva and Pixabay Resources

The Fuse Techni website was developed using **HTML5**, **CSS**, and **JavaScript**. HTML5 was used to create the structure and content of the website, CSS was used to enhance the visual appearance and responsiveness, and JavaScript was used to add interactive features such as navigation menus, service cards, and dynamic content display. Development was carried out using Visual Studio Code, and the website is hosted on GitHub Pages.

Website Pages and Content

1. Home

A home page is the gateway to an organisation's website throughout. It is the entry level of the website.

- i. Logo
- ii. Website name
- iii. Slogan
- iv. Link to other pages
- v. Full-width photo-Fuse Techni business operation's office
- vi. Summary of main activities of Fuse Techni NPC
- vii. Basic contact information
- viii. Copyright

2. About

It provides a brief overview of characteristics and goals of the organisation.

- i. Logo
- ii. Slogan
- iii. Link to other pages
- iv. Description of the organisation
- v. Vision and Mission
- vi. Members
- vii. Contact
- viii. Copyright

3. Contact

All contact information about the organisation.

- i. Logo
- ii. Slogan

- iii. Link to other pages
- iv. Contact information
- v. Location link
- vi. Copyright

4. Services

Services offered by Fuse Techni or any other organisations.

- i. Logo
- ii. Slogan
- iii. Link to other pages
- iv. Fuse Techni services
- v. Images
- vi. Contact information
- vii. Copyright

5. Support

Provides information on how to use Fuse Techni's products and services including how to operate using our website.

- i. Logo
- ii. Slogan
- iii. Link to other pages
- iv. FAQ
- v. Contact information
- vi. Help centre
- vii. Copyright

6. Donations

Contributions.

- i. Logo

Low-Fidelity Wireframes — Key Screens

Page	Layout Description
Home	Navigation bar, hero banner, organisation introduction, services preview, footer
About	Organisation overview, mission and vision, team members section
Services	Service cards, descriptions, contact button
Contact	Contact form, contact details, location map
Support	Search bar, FAQ section, support images
Donations	Donation information, student success stories, contribution options

Improvements to Part 1

Improvements to Part 1 Process Document

- Under “Website Goals and Objectives” heading:
 - ✓ I added sections for the Mission and Vision for Fuse Techni NPC.
- Mission:** Our mission is to empower our youth living in disadvantaged communities through digital skills training and employment opportunities.
- Vision:** To build a future where every individual has the technical agency and advantage to thrive in the digital economy.
- For “Website Objectives” section:
 - ✓ I improved the consistency of fonts and formatting by adjusting line spacing to 1.5
 - I improved the consistency of headings, fonts and formatting throughout the Process Document:
 - ✓ I changed the font under “Organisation Description:” from bold to normal.
 - ✓ I changed the font under “Reasons for Choosing the Organisation:” from bold to normal.
 - ✓ I then added a consistent line spacing of 1.5 and font Aptos: 11 throughout the Process Document
 - I updated the Table of Contents to include the new heading “Improvements to Part 1”.

Improvements to Part 1 Website

1. Home “index.html” Page
 - Added a `<div class="..."></div>` tag; `<div class="log-container"></div>`
 - Added a tag for the slogan “Digital skills for a better tomorrow”, `<p class="tagline">Digital skills for a better tomorrow.</p>`
 - Added a `<nav class="navbar">` tag.
 - Fixed the tags under navigation from `<a href="">...</li></a>` to `<li><a href="">...</a></li>` throughout the pages.
 - Added a hamburger tag throughout the pages.
 - Added a services link to explore our services
 - Added ‘What We Offer’ as a preview of the services we offer.

- Created a link to JavaScript: `<script src=" javascript/script.js"></script>`

2. About "about.html" Page

- Added a `<div class="..."></div>` tag; `<div class="log-container"></div>`
- Added a tag for the slogan "Digital skills for a better tomorrow", `<p class="tagline">Digital skills for a better tomorrow.</p>`
- Added a `<nav class="navbar">` tag.
- Fixed the tags under navigation from `<a href="">...</li></a>` to `<li><a href="">...</a></li>` throughout the pages.
- Added a hamburger tag throughout the pages.
- Added an "About Us" comment with a `<section class="about-section">` tag for the About Us description.
- Added Mission and Vision comment with a `<section class="mission-vision">` tag.
- Created `<div class="box">` tags for Mission and Vision.
- Added a team section comment with a `<section class="team-section">` tag.
- Created a `<div id="">` tag for member information with a heading instructing to click on the member card.
- Created a `<div class="team-container"></div>` tag.
- Created team cards using the `<div class="team-card" onclick="showMemberInfo()">` tag and function for all members.
- Linked it to JavaScript.

3. Contact "contact.html" Page

- Added a `<div class="..."></div>` tag; `<div class="log-container"></div>`
- Added a tag for the slogan "Digital skills for a better tomorrow", `<p class="tagline">Digital skills for a better tomorrow.</p>`
- Added a `<nav class="navbar">` tag.
- Fixed the tags under navigation from `<a href="">...</li></a>` to `<li><a href="">...</a></li>` throughout the pages.
- Added a hamburger tag throughout the pages.
- Changed all label, input and textarea tags.
- Added a `<div id="successMessage"></div>` if it was successful.
- Linked it to JavaScript.

4. Services "services.html" Page

- Added a `<div class="..."></div>` tag; `<div class="log-container"></div>`
- Added a tag for the slogan "Digital skills for a better tomorrow", `<p class="tagline">Digital skills for a better tomorrow.</p>`
- Added a `<nav class="navbar">` tag.
- Fixed the tags under navigation from `<a href="">...</li></a>` to `<li><a href="">...</a></li>` throughout the pages.
- Added a hamburger tag throughout the pages.
- Added a "Why choose Fuse Techni" section.
- Created cards with reasons using `<div class="reasons-container">` and `<div class="reason-card" onclick="showReason(this)">` tags.
- Added containers for services and also `<div class="service-card" onclick="toggleDescription(this)">` and `<div class="services-description">` for all services.
- Created a button for more information.
- Created a button to link to contact.html page.
- Linked it to JavaScript.

5. Support "support.html" Page

- Added a `<div class="..."></div>` tag; `<div class="log-container"></div>`
- Added a tag for the slogan "Digital skills for a better tomorrow", `<p class="tagline">Digital skills for a better tomorrow.</p>`
- Added a `<nav class="navbar">` tag.
- Fixed the tags under navigation from `<a href="">...</li></a>` to `<li><a href="">...</a></li>` throughout the pages.
- Added a hamburger tag throughout the pages.
- Changed 'How can we help you' search bar tags and added a comment.
- Added a FAQ comment.
- Changed "faq-container" to "faq-section" in `<div class=""></div>`
- Changed "faq" to "faq-card"
- Added an images comment, `<div class="support-images"></div>` and support text.
- Linked it to JavaScript.

6. Donations "donations.html" Page

- Added a `<div class="..."></div>` tag; `<div class="log-container"></div>`
- Added a tag for the slogan "Digital skills for a better tomorrow", `<p class="tagline">Digital skills for a better tomorrow.</p>`

- Added a `<nav class="navbar">` tag.
- Fixed the tags under navigation from `<a href="">...</li></a>` to `<li><a href="">...</a></li>` throughout the pages.
- Added a hamburger tag throughout the pages.
- Added student cards.
- Linked it to JavaScript.

7. CSS "styles.css"

- Added a professional colour scheme.
- Improved page layout using CSS.
- Added responsive navigation menu.
- Improved typography and readability.
- Added hover effects to buttons and navigation links.
- Added card designs for services.
- Improved spacing, margins, and alignment.
- Added animations and transitions for a modern appearance.
- Styled forms and input fields.

8. Functionality Improvements (JavaScript)

- Added form validation on the Contact page.
- Added interactive FAQ section.
- Added expandable service cards.
- Created cards for images.
- Added image/content sliders where applicable.
- Added donation amount calculator or donation confirmation message.
- Added smooth scrolling effects.

9. Testing and Fixing

- Fixed broken links between pages.
- Corrected HTML validation errors.
- Tested website on different browsers.

- Improved loading speed by optimizing images.
- Ensured all buttons and forms function correctly.

Improvements to Part 2

Improvements to Part 2 Process Document

1. Enlarged the budget table because it was not visible enough.
2. Enlarged the image for the links between the website pages.
3. Added 'Target audience'
4. Added 'Current Website Analysis'
5. Design and User Experience
 - Design aesthetic and branding
 - Colour
 - Typography
 - User experience considerations
 - Technical requirements
6. User experience wireframe description
7. Budget notes

Improvements to Part 2 Website

1. Changed the navigation to accommodate smaller screens.
2. Added a Gallery Lightbox on the About page.
3. Applied CSS and JavaScript to the Gallery Lightbox.
4. Added a Hero image slider on the home page.
5. Added an impact statistics section.
6. Changed the footer section to include social media and links.
7. Added a scroll-to-top button.
8. Designed a progress bar.
9. Added a volunteers application form.
10. Added a testimonials carousel.
11. Changed the contacts section and added contact information cards.
12. Added a floating WhatsApp button.
13. Added Meta tags.

SEO Strategies

1. Keyword Research
 - Programming
 - Web Development
 - Cybersecurity
2. Optimising Page Titles and Meta Description
 - Unique page titles
 - ✓ Home
 - ✓ About
 - ✓ Contact
 - ✓ Services

- ✓ Support
 - ✓ Donations
 - Meta Descriptions are included on what each page is about.
- 3. Use of Images
 - “alt” is added for every image
 - Image descriptions are included
- 4. Mobile-friendly Design
 - Used responsive layouts and navigation menu.
 - The website works well on phones and other devices.
- 5. Internal linking
 - The pages are linked together and include CSS and JavaScript links.
 - Pages are linked with buttons to access other pages.
- 6. Local SEO
 - Location is included on the website on the contact page with an embedded map.

Steps of Hosting a website

Hosting the Website on GitHub Pages

Step 1: Creating a GitHub Account

The first step in hosting the Fuse Techni NPC website is creating a GitHub account. The account provides access to repositories, version control features, and GitHub Pages hosting services.

Step 2: Creating a Repository

After creating an account, a new repository is created on GitHub. The repository is configured as public to allow GitHub Pages to publish the website online.

Step 3: Organising Website Files

Before uploading the website, all project files are organised into a structured folder system. The main pages, stylesheets, scripts, and images are placed in their respective folders to ensure that links and file paths function correctly when the website is published.

Step 4: Uploading Files to GitHub

Once the files are organised, upload to the GitHub repository. GitHub will store the website files securely and track all changes made to the project. This makes it easy to update, manage, and maintain the website over time.

Step 5: Enabling GitHub Pages

GitHub then automatically generates a public website from the uploaded files and makes it accessible through a web address.

Step 6: Deploying the Website

After GitHub Pages is enabled, the platform builds and deploys the website. The deployment process converts the repository contents into a live website that can be viewed by users through a web browser.

Step 7: Accessing the Live Website

Once deployment is complete, GitHub provides a unique website URL. This URL can be shared with users, stakeholders, and project assessors to access the live version of the Fuse Techni NPC website from anywhere with an internet connection.

Step 8: Testing and Maintenance

Regular maintenance is performed by updating content, fixing issues, and uploading changes to the GitHub repository, which automatically updates the live website.

The website is hosted through GitHub.
